What is this product?

Type

UCITS

Term

The Company is an open-ended fund with no specified maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIPs Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Objectives

The Product's investment objective is to provide capital growth over the long term primarily through investments which meet sustainable investment criteria. It attempts to limit the risk of capital loss in most market conditions by investing primarily in regulated products. There can be no guarantee that the Product will achieve its investment objective. The Product is considered to be actively managed, which means that the Investment Manager is not constrained by any index or benchmark in the selection of investments. The Investment Manager has discretion in managing the investments of the Product. The Product invests principally in regulated underlying funds, including open-ended exchange traded funds and index tracker funds. The Product may also invest up to 49% of Net Asset Value (NAV) directly in certain securities, including government and sovereign bonds such as UK gilts, or sustainable bonds where it believes that such direct investment to be more efficient (e. g. where direct investment results in lower costs or increased liquidity) than investment in underlying funds. The Product will seek to invest in underlying funds that meet one of more of the Sustainable Criteria laid out by the Global Sustainable Investment Alliance (which may include exclusionary and/or positive screening, ESG integration, sustainability themed investing and community impact investing). In the context of direct investments, the Product will apply internal sustainability factors to the relevant sovereign or corporate issuer. The Product may also gain direct exposure to cash and cash equivalents and derivatives. The Product is a multi-asset fund and may obtain exposure to a broad range of asset classes through its investment in underlying funds, direct securities and derivatives. Exposure to equity markets will range between 40% to 85% of NAV. The Product has no bias to any underlying asset class, country or

region and, subject to the investment restrictions, provides exposure to investments which are listed or traded on Regulated Markets globally and which may include exposures to Emerging Markets and to fixed income securities that are rated below investment grade. The Product may use a number of simple derivative instruments for investment purposes and / or efficient portfolio management purposes. The Product may not be leveraged in excess of 100% of its NAV, through the use of derivatives. Further information in respect of the Product's use of derivatives is set out in the 'Use of Financial Derivative Instruments (FDI)' of The Product's Supplement. The Base Currency of The Product is GBP Sterling. This share is denominated in GBP. Non-Base Currency Share Classes are hedged meaning that, using derivatives, the base currency of the Product is to a large extent hedged into the Share Class' currency, the use of derivatives may give rise to an additional exposure. Income from investments in the Product is not distributed but will be retained in the Product.

Intended Retail Investor

This Product is intended for investors who understand the degree of risk, who can tolerate a medium to low level of volatility and who are able to bear any losses (which may equal the whole amount invested) that may result from an investment in the Product. The Product is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Due to effects of unusual market conditions, other risks could be triggered, refer to “Risk Considerations” in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between December 2021 and December 2023.

The moderate scenario occurred for an investment in the benchmark between March 2014 and March 2019.

The favourable scenario occurred for an investment in the benchmark between January 2016 and January 2021.

Recommended holding period: 5 years.

Example Investment: GBP 10,000.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Company design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Company default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	122 GBP	897 GBP
Annual cost impact (*)	1.2%	1.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.8% before costs and 7.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
